

Lassa fever Situation Report

Epi Week 12: 20th March – 26th March 2023

Key Points

Table 1: Summary of current week (12), cumulative Epi week 1- 12, 2023 and comparison with previous year (2022)

Reporting Period	Suspected cases	Confirmed cases	Probable cases	Deaths (Confirmed cases)	Case Fatality Ratio (CFR)	States and LGAs affected (Confirmed cases)
Current week (week 12)	283	39	0	2	5.1%	State(s): 6 LGA(s): 17
2023 Cumulative (week 1-12)	4108	823	4	144	17.5%	State(s): 24 LGA(s): 98
2022 Cumulative (week 12)	3542	681	28	127	18.6%	State(s):23 LGA(s):92

Highlights

- In week 12, the number of new confirmed cases increased from 38 in week 11 2023 to 39 cases. These were reported from Bauchi, Ondo, Edo, Taraba, Kaduna, and Kogi States (Table 3)
- Cumulatively from week 1 to week 12, 2023, 144 deaths have been reported with a case fatality rate (CFR) of 17.5% which is lower than the CFR for the same period in 2022 (18.6%)
- In total for 2023, 24 States have recorded at least one confirmed case across 98 Local Government Areas (Figures 2 and 3)
- Seventy-two (72%) of all confirmed Lassa fever cases were reported from these three states (Ondo, Edo, and Bauchi) while 28% were reported from 3 states with confirmed Lassa fever cases. Of the 71% confirmed cases, Ondo reported 32%, Edo 29%, and Bauchi 11%
- The predominant age group affected is 21-30 years (Range: 1 to 93 years, Median Age: 32 years). The male-to-female ratio for confirmed cases is 1:0.9 (Figure 4)
- The number of suspected cases increased compared to that reported for the same period in 2022.
- Three new Healthcare workers was affected in the reporting week 12
- National Lassa fever multi-partner, multi-sectoral Emergency Operations Centre (EOC) activated to coordinate the response activities at all levels

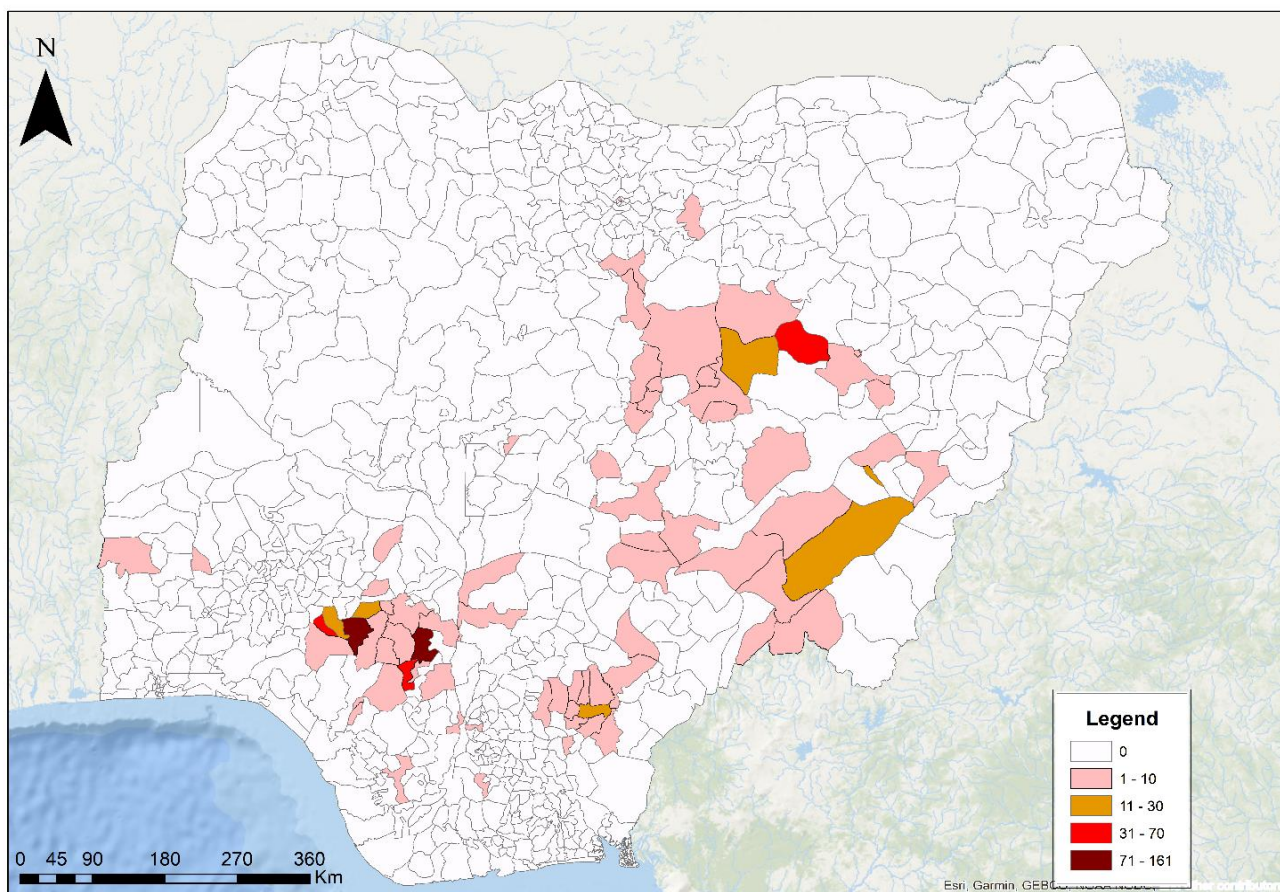

Figure 3. Confirmed Lassa fever rate per 100,000 population for LGAs in Nigeria, week 12, 2023

Table 2: Key indicators for current week 2023 and trend compared to the previous week, Nigeria

Symptomatic contacts	Number for current week	Trend from previous week	Cumulative number for 2023
Probable cases	0	↔	4
Health Care Worker affected	3	↑	38
Cases managed at the treatment centres	37	↑	679
Contact tracing			
Cumulative contact listed	157	↓	3649
Contacts under follow up	498	↓	498
Contacts completed follow up	0	↔	3148
Symptomatic contacts	0	↔	14
Positive contacts	0	↔	21
Contacts lost to follow up	0	↔	0

Key

- ↑ Increase
- ↓ Decrease
- ↔ No difference

Table 3. Weekly and Cumulative number of suspected and confirmed cases for 2023

States	Current week: (Week 12)					Cumulative (Week 1 - 12)					
	Cases			Deaths		Cases			Deaths		
	Suspected	Confirmed	Trend	Probable HCW*	(Confirmed Cases)	Suspected	Confirmed	Probable HCW*	(Confirmed Cases)		
1 Ondo	75	13	▲	3		1049	262	12	30		
2 Edo	93	7	▼		1	1423	238	4	31		
3 Bauchi	43	14	▲		1	589	92	1	7

Figure 6: Trend of confirmed cases by epidemiological week, 2019– 2023, Nigeria

Response activities

- Intensive response activities through a one-health approach in affected LGAs
- Designed a tool to collect geo-points for all Lassa fever confirmed cases in the States
- Update of VHF Case Investigation Form (CIF) database
- Enhanced surveillance (contact tracing and active case finding) in affected states.
- Monitoring of outbreak emergency composite indicators to guide action
- Implementation of targeted risk communication activities in most affected States
- Diagnosis of all samples in the Eight Lassa fever testing laboratories across the country
- External Quality Assurance (EQA) panel preparation for all testing laboratories ongoing
- Dissemination of reviewed IPC guideline, health facility IPC advisory and healthcare worker advisories
- Deployed NRRT to 6 states – Bauchi, Benue, Ebonyi, Edo, Ondo & Taraba
- Periodic implementation of vector control measures in Edo and Ondo States
- Sent Lassa fever alert letters to Governors' forum, State Ministries of Health, professional bodies (NMA, MDCAN, NARD, NDA, MWAN, AGPMPN, AMLSN, NANNM) etc.
- Conducted Lassa fever risk assessment
- Confirmed cases are treated at identified treatment centres across the states.
- Dissemination of reviewed case management and safe burial practices guidelines
- 1st Draft of protocol for identification and management of LF in pregnant women completed
- Mortality review of Lassa fever deaths
- In-depth investigation of healthcare worker infections
- External Quality Assurance (EQA) panel preparation for all testing laboratories ongoing
- Distribution of response commodities -PPEs, Ribavirin (injection and tablets) body-bags, thermometers, hypochlorite hand sanitizers, IEC materials distributed to states and treatment centres.
- Implementation of Nigeria Lassa fever epidemiological Study supported by CEPI
- Multi-sectoral Public Health Emergency Operation Centres (PHEOC) activated at the National and affected States

Challenges

- Late presentation of cases leading to an increase in CFR
- Poor health-seeking behaviour due to the high cost of treatment and clinical management of Lassa fever
- Poor environmental sanitation conditions observed in high-burden communities
- Poor awareness observed in high-burden communities

Notes on this report

Data Source

Information for this disease was case-based data retrieved from the National Lassa fever Emergency Operations Centre.

Case definitions

- **Suspected case:** any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- **Confirmed case:** any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)

- **Probable case:** any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- **Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

Calculations

- Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
