

## Annex 11K: IDSR Outbreak Line List

A line list captures the relevant information from each reported case for analysis and action. Listing each case and their information will help provide the data needed to assess characteristics of cases to help guide response activities. This is an important tool to collect information and Analyse quickly.

During an outbreak, the line list must be established and used as a primary data collection tool. The columns under the IDSR Line List should be changed based on the situation. The information from each reported case should be added to a single row in the spreadsheet. This paper form should be routinely incorporated in the IDSR Routinely Reported Database to facilitate comprehensive analysis and reporting to next level daily as well as on weekly basis.
