# Highlights

- In week 29, the number of new confirmed cases increased from 5 in week 28, 2022 to 10 cases. These were reported from Edo and Ondo States (Table 3)
- Cumulatively from week 1 to week 29, 2022, 164 deaths have been reported with a case fatality rate (CFR) of 19.1% which is lower than the CFR for the same period in 2021 (23.7%)
- In total for 2022, 24 States have recorded at least one confirmed case across 99 Local Government Areas (Figures 2 and 3)
- Of all confirmed cases, 70% are from Ondo (30%), Edo (26%), and Bauchi (14%) States.
- The predominant age group affected is 21-30 years (Range: 0 to 90 years, Median Age: 30 years). The male-to-female ratio for confirmed cases is 1:0.8 (Figure 4)
- The number of suspected cases has increased compared to that reported for the same period in 2021
- One new Healthcare worker affected in Ondo State
- National Lassa fever multi-partner, multi-sectoral Technical Working Group (TWG) continues to coordinate the response activities at all levels

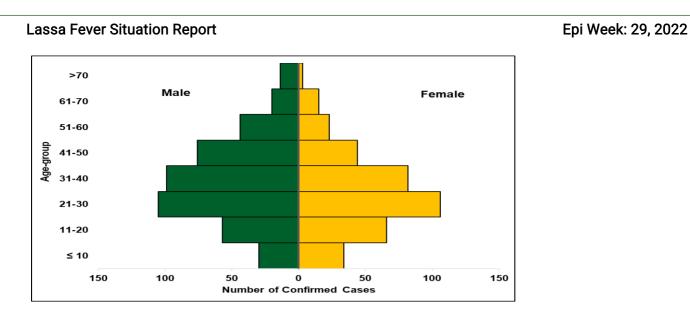

Figure 4. Age and sex pyramid showing the number of confirmed Lassa fever cases for 2022

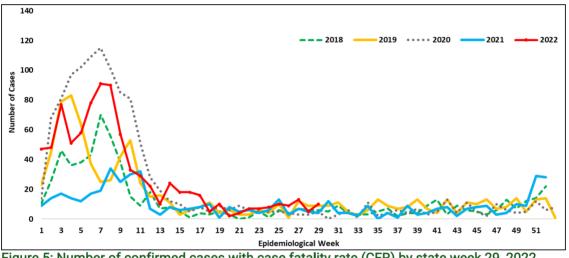

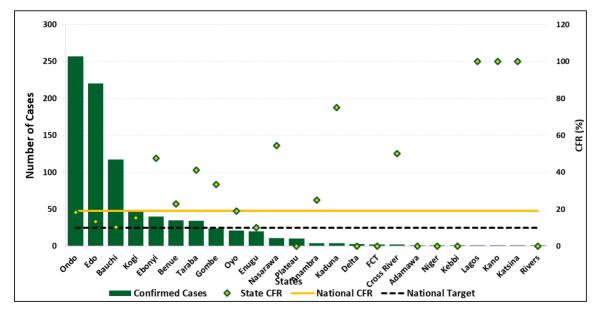

Figure 5: Number of confirmed cases with case fatality rate (CFR) by state week 29, 2022

## Lassa Fever Situation Report Response activities

- Lassa fever alert letters sent to States
- The National Emergency Operations Centre response mode Level 2 activated for effective multisectoral, multi-disciplinary coordination of 2022 Lassa fever outbreak response
- Lassa fever preparedness assessment carried out for 36 States and FCT
- State Public Health Emergency Operations Centre activated in affected States
- The Eight Lassa fever molecular laboratories in the NCDC network are working full capacity to ensure that all samples are tested, and results provided within the shortest turnaround time
- Confirmed cases are treated at identified treatment centres across the states
- Dissemination of reviewed case management and safe burial practices guidelines
- · Dissemination of reviewed IPC guideline and health facility IPC advisory
- Risk communications and community engagement activities have been scaled up across states using television, radio, print, social media and other strategies
- Implementation of Lassa fever Environmental response campaign in high burden states by Federal Ministry of Environment
- Distribution of medical response commodities to states and treatment centre
- Engagement of adhoc data clerks to upload case management data on SORMAS
- Deployment of National Rapid Respond Teams (NRRT) deployment to Nasarawa, FCT, Edo, Ondo, Bauchi, Ebonyi, Oyo, Taraba, and Benue
- Coordinated sub-national Lassa fever surveillance and response intensive workshop

# Notes on this report

#### Data Source

Information for this disease was case based data retrieved from the National Lassa fever Emergency Operations Centre.

#### Case definitions

- Suspected case: any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- **Confirmed case**: any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- **Probable case**: any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- **Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

## Calculations

• Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
