

Lassa Fever Situation Report

Epi Week 8: 17th – 23rd February 2025

Key Points

Table 1: Summary of the current week (8), cumulative Epi week 8, 2025 and comparison with the previous year (2024)

Reporting Period	Suspected cases	Confirmed cases	Probable cases	Deaths (Confirmed cases)	Case Fatality Ratio (CFR)	States and LGAs affected (Confirmed cases)
Current week (week 8)	314	54	0	6	11.1%	State(s):8 LGA(s): 26
2025 Cumulative (week 8)	2492	506	5	95	18.8%	State(s):12 LGA(s): 70
2024 Cumulative (week 8)	3213	573	16	108	18.8%	State(s):24 LGA(s): 98

Highlights

- In week 8, the number of new confirmed cases increased from 38 in epi week 7, of 2025 to 54. These were reported in Bauchi, Ondo, Edo, Taraba, Ebonyi, Plateau, Benue, and Kogi States (Table 3)
- Cumulatively in week 8, 2025, 95 deaths have been reported with a case fatality rate (CFR) of 18.8% which is the same CFR for the same period in 2024 (18.8%)
- In total for 2025, 12 States have recorded at least one confirmed case across 70 Local Government Areas (Figures 2 and 3)
- Seventy-three (73%) of all confirmed Lassa fever cases were reported from these three states (Ondo, Bauchi and Edo) while 27% were reported from 9 states with confirmed Lassa fever cases. Of the 73% confirmed cases, Ondo reported 32%, Bauchi 24%, and Edo 17%
- The predominant age group affected is 21-30 years (Range: 1 to 94 years, Median Age: 30 years). The male-to-female ratio for confirmed cases is 1:0.8 (Figure 4)
- The number of suspected cases decreased compared to that reported for the same period in 2024.
- One new healthcare worker was affected in the reporting week 8.
- National Lassa fever multi-partner, multi-sectoral Incident Management System (IMS) activated to coordinate the response activities at all levels.

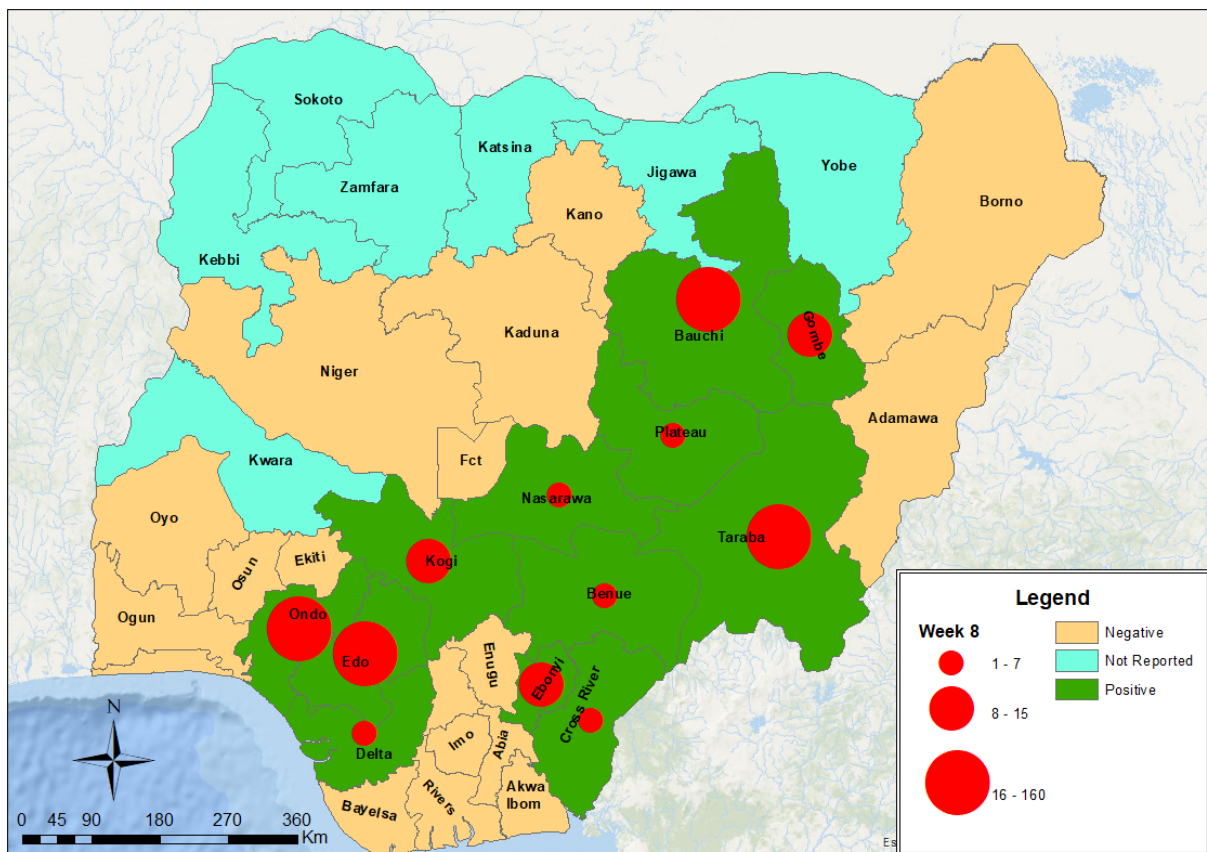

Figure 2: Confirmed Lassa Fever Cases by States in Nigeria, Week 8, 2025

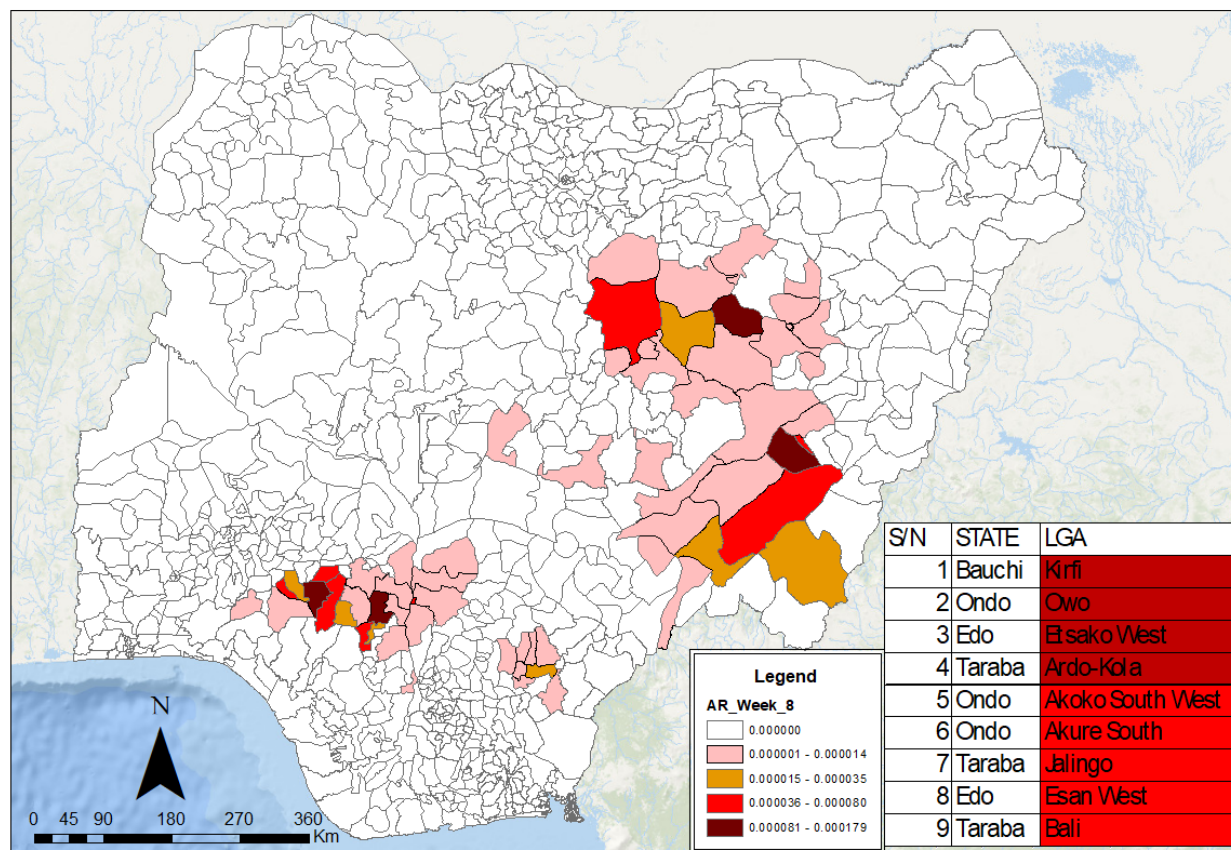

Figure 3: Confirmed Lassa Fever Attack Rate per 100,000 Population for LGAs in Nigeria, Week 8, 2025

Table 2: Key Indicators for the Current Week in 2025 and Trend Compared to the Previous week, Nigeria

Symptomatic contacts	Number for current week	Trend from previous week	Cumulative number for 2025
Probable cases	0	↔	5
Health Care Worker affected	1	↑	16
Cases managed at the treatment centres	48	↑	411
Contact tracing			
Cumulative contact listed	52	↓	897
Contacts under follow up	382	↓	382
Contacts completed follow up	10	↓	194
Symptomatic contacts	0	↓	14
Positive contacts	1	↓	12
Contacts lost to follow up	0	↔	0

Key

- ↑ Increase
- ↓ Decrease
- ↔ No difference

Table 3: Weekly and Cumulative Number of Suspected and Confirmed Cases for 2025

States	Current week: (Week 8)					Cumulative (Week 1 - 8)				
	Cases			Probable HCW*	Deaths (Confirmed Cases)	Cases			Deaths (Confirmed Cases)	
	Suspected	Confirmed	Trend			Suspected	Confirmed	Probable HCW*		
1 Ondo	80	10	▲			678	160	8	21	
2 Bauchi	76	22	▲	1	1	475	122	1	4	10
3 Edo	109	8	▲		1	794	88	1	14	
4 Taraba	10	7	▼		2	177	80	1	25	
5 Ebonyi	9	2	▲			69	15		7	
6 Kogi	5	1				58	14		4	
7 Gombe	3					38	11	1	2	6
8 Plateau	3	2				24	7		2

Response activities

- Shared findings on the ongoing LF Case Management need assessment across the designated Treatment Centres
- Held the weekly National risk communication stakeholders meeting
- Held bilateral meeting with WHO HQ on areas of mutual collaboration
- Held a pre-deployment briefing for members of NRRT
- Deployed the 2nd Batch of NRRT to three states (Gombe, Nasarawa and Benue)
- Participated in the official handing over of laboratory equipment by IHVN to the Ondo State Public Health laboratory
- Held bilateral discussions with MSF Geneva on mutual areas of collaboration for Lassa fever
- Identified areas of mutual collaboration with the Nigeria Health Watch
- Conducted LF CM need assessment across the designated Treatment Centers
- Held the final and 7th Lassa Fever webinar in the readiness series for the 2024/2025 outbreak season
- Case management pillar with support from Georgetown Global Health Nigeria (GGHN) facilitated the 7th LF webinar
- Commenced the first round of 3-monthly participants follow-up and blood sampling exercise at FMC Owo and ISTH Edo states sites
- Conducted the baseline audiometry assessment at FMCO and ISTH sites
- Deployed National Rapid Response Teams to support onsite control and management efforts using a One Health approach
- Collaborated with the HEPR department to hold a briefing for teams to guide logistics, reporting channels and conduct of teams in line with stipulated guidelines
- Ongoing need assessment across the designated LF TCs
- Planning meeting for a Monthly Webinar Series on Lassa fever Case Mgt (Initiated by Georgetown University & its local affiliate, GGHN)
- Orientation on the use of the Lassa fever Advocacy toolkit for preparedness and response supported by BA-N
- Plan to hold the 6th Lassa Fever webinar series in collaboration with the FMENv and partners
- HCWs trained on case mgt in Bauchi, Ebonyi & Benue states
- Planning meeting for training of HCWs on case mgt in Plateau & Taraba state scheduled
- Activation of the Lassa Fever Incident Management System coordinated at the National Public Health Emergency Operation Centre
- Reviewed the Lassa Fever Advocacy toolkit with support from BA-N
- Held the 5th Webinar in the series in collaboration with the Laboratory pillar
- Conducted the Lassa fever risk assessment in preparation for the 2025 outbreak season
- Daily reviews of updates from SITAware/PHI meetings
- Continued provision of offsite support to all States sending daily and weekly situation reports
- Confirmed cases are treated at identified treatment centres across the states
- Dissemination of reviewed case management and safe burial practices guidelines
- IPC Guideline development workshop conducted in Bauchi State supported by WB through CoPREP
- Diagnosis of all samples in the Eight Lassa fever testing laboratories across the country
- External Quality Assurance (EQA) panel preparation for all testing laboratories ongoing
- Optimization of UBTH Benin and FMC Makurdi
- Participated in the 5th webinar series focused on Laboratory Preparedness for Lassa fever Outbreaks
- Distribution of response commodities -PPEs, Ribavirin (injection and tablets) body-bags, thermometers, hypochloride hand sanitizers, and IEC materials distributed to states and treatment centres
- Development of distribution plan and the prepositioning of Lassa Fever Commodities
- Implementation of Nigeria Lassa fever epidemiological Study supported by CEPI
- Shared updates on the 'enable LF program-1.5' with funding from CEPI
- Shared report on Enable 1.5 Project Achievements
- Dissemination of media content including press releases, tweets, public advisories etc
- Sensitization of healthcare workers and other community structures across hotspot LGAs
- Collaborated with BA-N to review and validate the Lassa Fever advocacy toolkit
- Conducted a community survey in 3 States- Bauchi, Ebonyi, and Edo
- Developed a targeted communication strategy based on the data from the community survey conducted in 3 states
- Update of VHF Case Investigation Form (CIF) database
- Enhanced surveillance (contact tracing and active case finding) in affected states.
- Monitoring of outbreak emergency composite indicators to guide action

- Conducted the LF webinar series focused on Surveillance
- Intensive response activities through a one-health approach in affected LGAs
- Activation of state burial team in Ogun State
- Developed and disseminated SMS on LF with the support of Breakthrough Action Nigeria (BA-N) in Benue State

Challenges

- Late presentation of cases leading to an increase in CFR
- Poor health-seeking behaviour due to the high cost of treatment and clinical management of Lassa fever
- Poor environmental sanitation conditions observed in high-burden communities
- Poor awareness observed in high-burden communities

Notes on this report

Data Source

Information for this disease was case-based data retrieved from the National Lassa Fever Technical Working Group.

Case definitions

- **Suspected case:** any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/haemorrhage.
- **Confirmed case:** any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- **Probable case:** any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- **Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

Calculations

- Case Fatality Rate (CFR) for this disease is reported for confirmed cases only.
