# **Highlights**

- In week 11, the number of new confirmed cases increased from 30 in week 10, 2021 to 32 cases. These were reported from 8 States (Ondo, Edo, Ebonyi, Plateau, Benue, Kogi, Delta and Bauchi) (Table 3)
- Cumulatively from week 1 to week 11, 2021, 46 deaths have been reported with a case fatality rate (CFR) of 20.6% which is higher than the CFR for the same period in 2020 (17.8%)
- In total for 2021, 14 States have recorded at least one confirmed case across 50 Local Government Areas (Figure 2 and 3)
- Of all confirmed cases, 85% are from Edo (43%), Ondo (26%) and Taraba (8%) States.
- The predominant age-group affected is 21-30 years (Range: <1 to 70 years, Median Age: 30 years). The male to female ratio for confirmed cases is 1:0.9 (Figure 4)
- The number of suspected cases has decreased compared to that reported for the same period in 2020
- No new Healthcare worker affected in the reporting week 11
- National Lassa fever multi-partner, multi-sectoral Technical Working Group (TWG) continues to coordinate the response activities at all levels

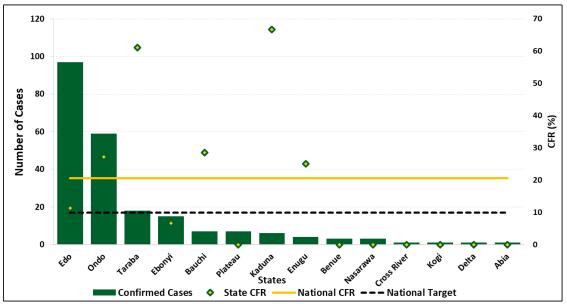

Figure 5: Number of confirmed cases with case fatality rate (CFR) by state week 11 2021

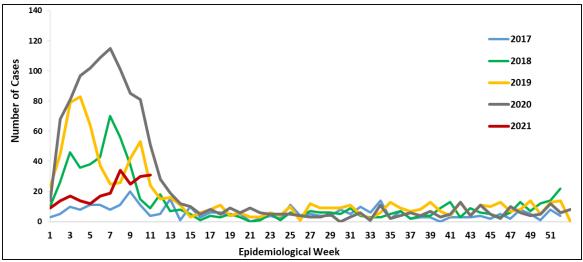

Figure 6: Trend of confirmed cases by epidemiological week, 2017-2021, Nigeria

## **Response activities**

Conducted 2021 Lassa fever high burden States preparedness/response engagement meeting

Epi Week: 11 2021

- Lassa fever alert letters sent to States
- The National Emergency Operations Centre alert mode activated 2021 for effective multisectoral, multi-disciplinary coordination of Lassa fever response
- State Public Health Emergency Operations Centre activated in affected States
- The five Lassa fever molecular laboratories in the NCDC network are working full capacity to ensure that all samples are tested and results provided within the shortest turnaround time
- Confirmed cases are treated at identified treatment centres across the states
- Dissemination of reviewed case management and safe burial practices guidelines
- Risk communications and community engagement activities have been scaled up across states using television, radio, print, social media and other strategies
- Implementation of Lassa fever Environmental response campaign in high burden states by Federal Ministry of Environment

# Notes on this report

#### **Data Source**

Information for this disease was case based data retrieved from the National Lassa fever Emergency Operations Centre.

#### Case definitions

- Suspected case: any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- Confirmed case: any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- Probable case: any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- **Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

### Calculations

• Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
