

MEASLES SITUATION REPORT

Serial Number 01

Data as at January 31st 2024

HIGHLIGHTS

In January, 2024:

- In January, Borno (1253), Ogun (77), Jigawa (72), Katsina (66) and Ekiti (60) accounted for 70.8% of the 2156 suspected cases reported
- Of the 2,157 suspected cases reported (66.8%) were confirmed (224 lab-confirmed, 1048 clinically compatible and 170 epidemiologically linked), 540 (25.1%) were discarded & 175 (8.1%) were pending
- A total of 301 LGAs across 35 states reported at least one suspected case
- A total of 110 LGAs across 25 states reported at least one confirmed case
- Fourteen (14) deaths were recorded (**13 from clinically compatible cases and 1 from discarded case**)

Comparing January, 2023 to January, 2024:

- In January 2023, a total of 2,748 cases were reported while in January 2024, 2,157 suspected cases were reported.
- Of the suspected cases reported in 2023, states that reported highest number of cases are; Borno (1,446), Zamfara (124), Bauchi (84), Katsina (76), and Ondo (76) while in 2024, Borno (1255), Ogun (77), Jigawa (72), Katsina (66) and Ekiti (60) reported highest number of cases
- The age group 9 - 59 months accounted for over 60% of the cases across the two years. In January 2023, a total of 6 deaths (CFR = 0.2%) was recorded while in January 2024, 14 deaths (CFR = 0.64%) was recorded
- In January 2023 & 2024 over 60% of the cases did not receive any dose of measles vaccine (“zero dose”)

Measles outbreaks as at January 31st 2024:

- In January 2024, 49 LGAs across 16 states (Kaduna (9); Borno (7); Bauchi and Sokoto (4) each; Jigawa (3); Katsina, Zamfara, Benue, Kwara, Yobe, (2) each; Taraba, Kebbi, Gombe, Niger, Adamawa, and Kano (1) each.
- Cumulatively, a total of 43 LGAs across 16 states recorded at least one measles outbreak in January this year

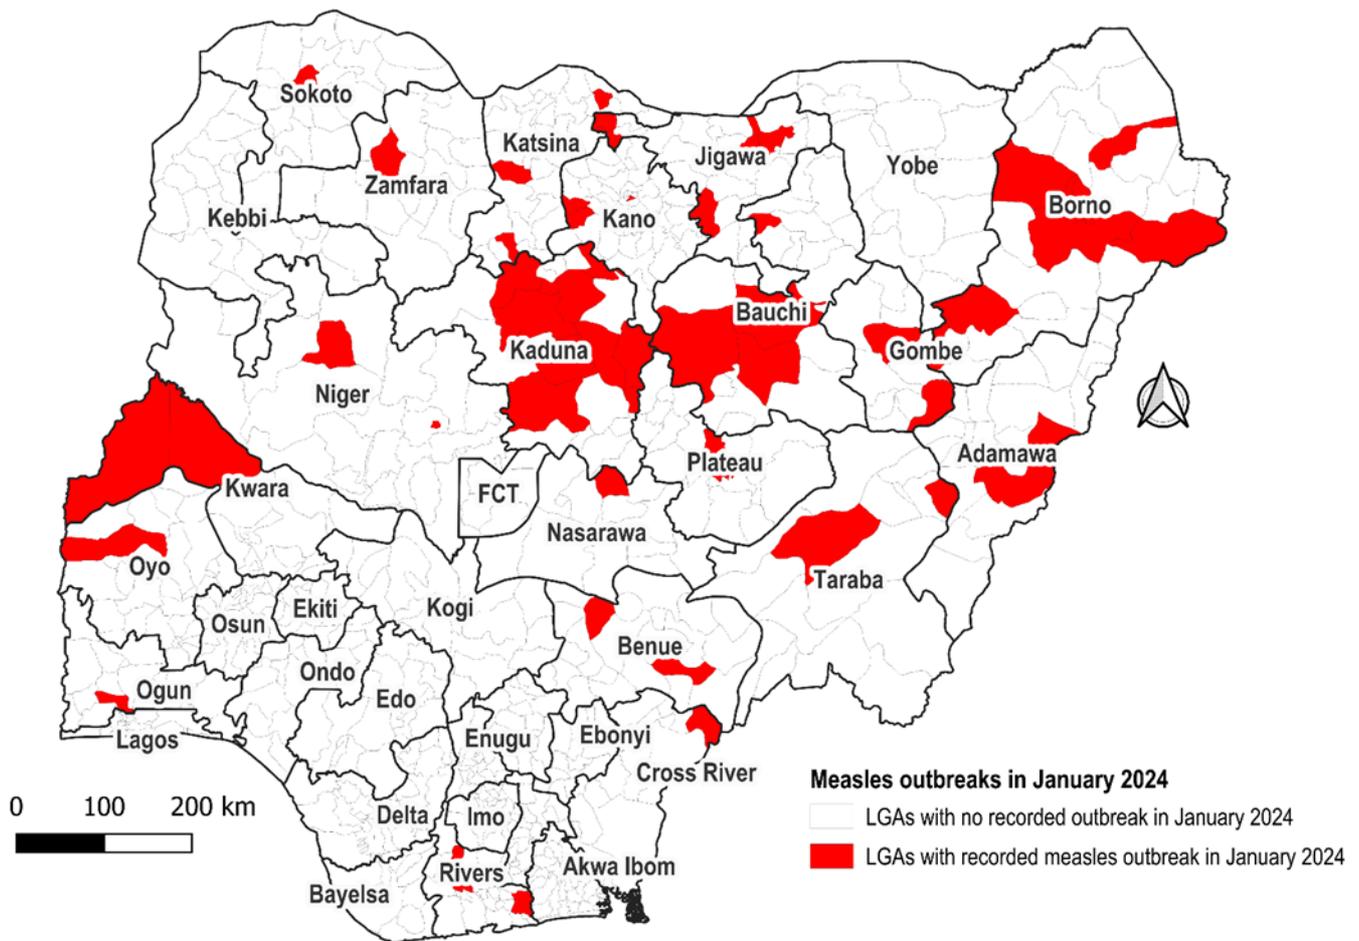

Figure 1: Distribution of measles outbreak by LGAs/States in Nigeria, Jan 2024

Table 2: Trend of measles surveillance performance indicators, Jan – Dec, 2021 – 2023

Surveillance Performance Indicator	Target	2021 (Jan)	2022 (Jan)	2023 (Jan)	2024 (Jan)
Annualized measles Incidence	< 1/million population	36.8	240.7	98.7	53.4
Annualized non-measles febrile rash illness (NMFRI) rate	≥ 2/100,000 population	0.2	5.3	3.9	3.1
Proportion of reported measles cases from whom blood specimen was collected	≥ 80%	68.30%	33.20%	77.60%	94.80%
Proportion of LGAs that reported at least 1 measles case with blood specimen collected	≥ 80%	25.30%	59.40%	44.60%	36.60%
Annualized rate of investigation (with blood specimens) of suspected measles cases	> 1/100,000 population	0.3	0.8	0.5	0.4
Proportion of lab confirmed measles cases	< 10%	26.40%	14.60%	15.90%	21.30%
Proportion of serum specimens arriving measles laboratory in good condition	≥ 90%	93%	87%	95%	86.8

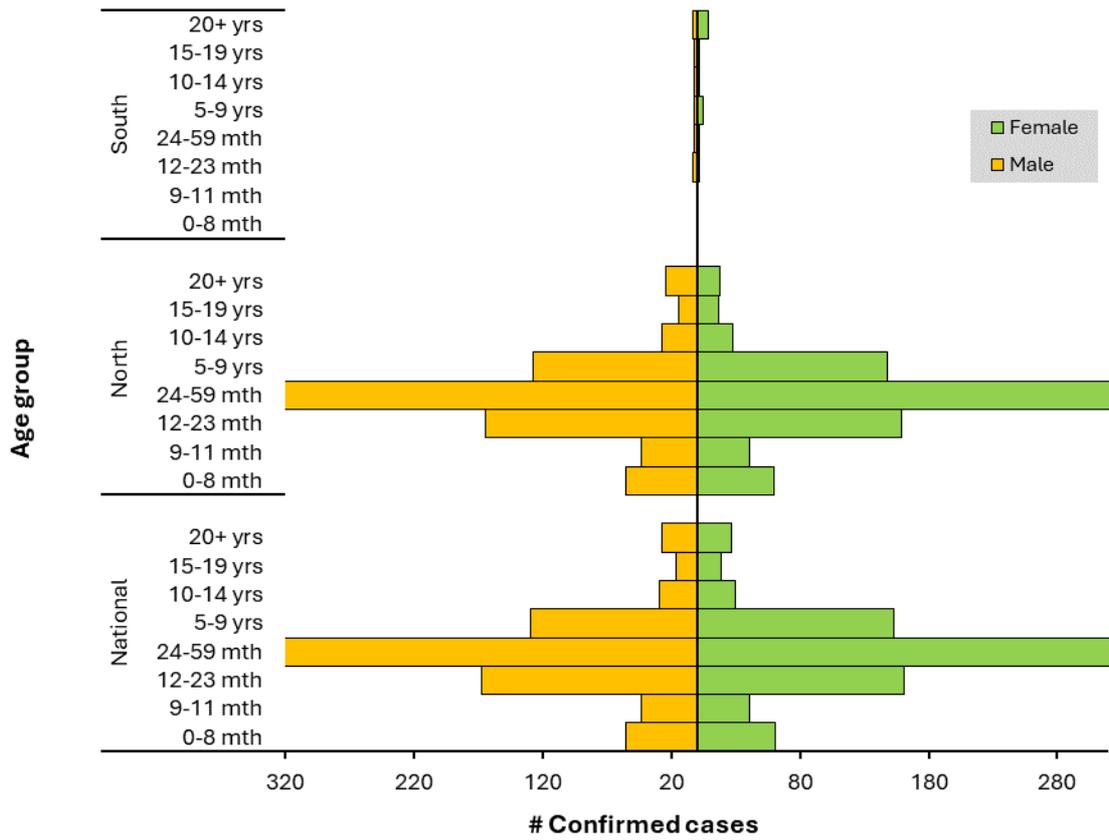

Figure 7: Age-sex distribution of confirmed measles cases in Nigeria (Northern and Southern zone), Jan, 2024

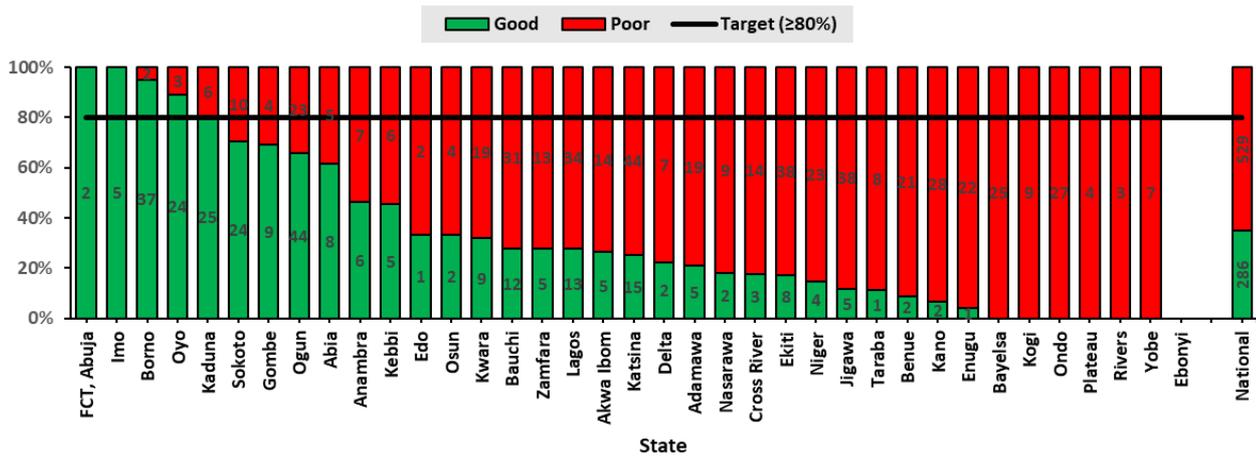

Figure 8: Proportion of measles samples reaching the laboratory in good time, Jan 2024

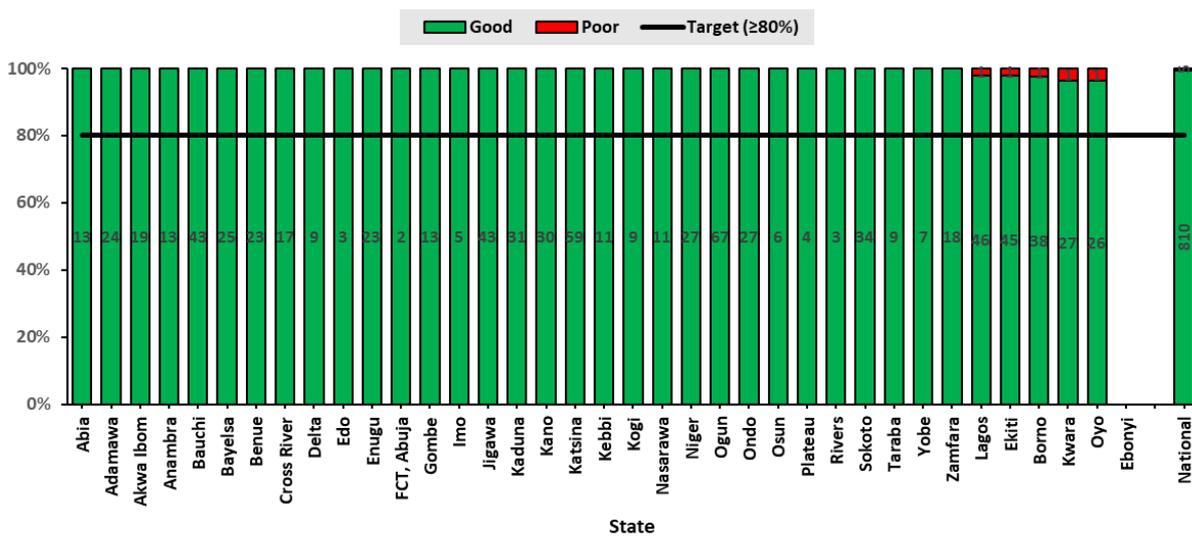

Figure 9: Proportion of measles samples getting to the lab in good condition, Jan 2024

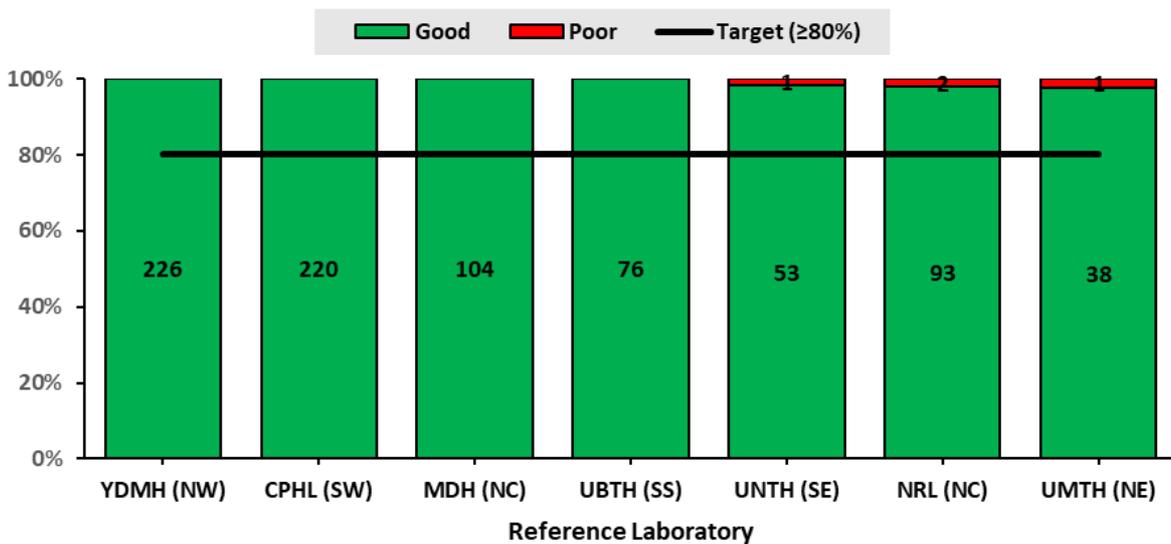

Figure 10: Proportion of measles samples with good turnaround time, Jan 2024

Key Activities Conducted

Coordination:

- Supportive Supervisory visit to the eight (8) Measles, Rubella and Yellow Fever laboratories.
- Validation of Measles Outbreak Preparedness and Response (MOBR) Training materials
- Ongoing Measles Outbreak Response (MOBR) Capacity Building Project.
- National Measles TWG closely monitoring measles surveillance data and providing feedback to relevant agencies and development partners.
- Virtual biweekly measles TWG meetings – via zoom.
- Monthly surveillance data review.
- Weekly surveillance and laboratory data harmonization ongoing.

Laboratory:

- Testing of samples ongoing in the eight Reference Laboratories across the country.
- Weekly harmonisation of laboratory results from across the laboratories ongoing.
- Weekly feedback of key performance indicators to measles laboratories.

Challenges

- Delay in reporting cases into the SORMAS database from states/LGAs

Next Steps

- Follow up with states (State Epids and SSO) and measles reference laboratories on using SORMAS in timely collecting and transmitting surveillance and laboratory data respectively.
- Weekly measles surveillance data review.
- Weekly/monthly tracking of surveillance and laboratory performance indicators and feedback.
- Virtual biweekly measles TWG meetings for timely review of measles surveillance data and feedback.
