**Highlights**

- In the current Lassa Fever outbreak, fifteen (15) States (Ogun, Bauchi, Plateau, Ebonyi, Ondo, Edo, Taraba, Nasarawa, Rivers, Kaduna, Gombe, Cross-River, Borno, Kano and Kogi) have reported at least one confirmed case – *Figure 1*
- As at week 14 (April 1-7, 2017), the outbreak is still active\(^1\) in 13 states (Bauchi, Plateau, Ebonyi, Ondo, Edo, Taraba, Nasarawa, Kaduna, Gombe, Cross-River, Borno, Kano and Kogi). Ogun and Rivers States have completed 42 days (two incubation periods) with no new confirmed case. Outbreak now over in both states.
- Since the onset of LF outbreak in Dec. 2016 (Week 49), a total of 148 cases have been classified as: confirmed\(^2\) (135) and probable\(^3\) (13) with 64 deaths (51 deaths in confirmed and 13 in probable) recorded.
- Case Fatality Rate for confirmed and probable cases is 43.2%
- In the reporting Week 14 (April 1 - 7, 2017), nine (9) new suspected cases were reported in Kano (5) and Bauchi (4) States with one (1) new laboratory confirmed case in Edo state.

---

\(^1\) “Active” means where there has been at least one confirmed case, and contacts within 21 days post exposure

\(^2\) Any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation).

\(^3\) Any suspected case (see definition above) but who died without collection of specimen for laboratory testing
