<b>TITLE:</b>	<b>SITUATION REPORT OF CLUSTER OF YELLOW FEVER OUTBREAK IN BAUCHI STATE, NIGERIA</b>
<b>SERIAL NUMBER:</b>	<b>BAS 002</b>
<b>EPI-WEEKS:</b>	<b>35 – 38</b>
<b>DATE:</b>	<b>31<sup>st</sup> August – 18<sup>th</sup> September, 2019</b>

### HIGHLIGHTS

- Nigeria is currently responding to an outbreak of yellow fever, in people who are either resident in, or have visited Alkaleri Local Government Area (LGA) in Bauchi since the 1<sup>st</sup> of August 2019
- Suspected and confirmed cases with an epidemiological link to Bauchi have been reported in Borno, Kano, Gombe and Katsina states
- Of the cases with an epidemiological link to Bauchi, current epi summary is as follows:
  - 243 suspected cases
  - 10 presumptive positives cases (IgM positive on serology)
  - 28 confirmed cases by RT-PCR
  - 34 deaths
  - 5 states affected
  - 42 LGAs affected

The National Yellow Fever technical working group (TWG) activated the national Incident Management System (IMS) to coordinate the response activities, on the 5<sup>th</sup> of September 2019.

- **Epi Summary from week 27 – 38 September 2019:**
  - Two hundred and forty-three (243) suspected cases have been reported in 42 LGAs in five states.
    - Bauchi (84), Borno (82), Gombe (7), Kano (4) and Katsina (66) (see table 1 below)
  - Number of samples collected among suspected cases is 195 (8.2%)
  - Number of presumptive positives is 10 (IgM positive on serology) and one inconclusive was recorded (Borno-6, Kano-1, Katsina-3 and 1 inconclusive from Borno). All have been sent to Institut Pasteur Dakar (IP Dakar) for further testing.
  - A total of 28 (14.9%) cases have been confirmed in the Nigerian testing Laboratories using RT-PCR from:
    - NCDC National Reference Laboratory Gaduwa -27; [Bauchi (20), Katsina (4), and Gombe (3)
    - Lagos University Teaching Hospital -1; Kano (1)
  - A total of 34 deaths have been recorded among suspected cases- Bauchi (10), Kano (1), Katsina (23), with Case fatality rate (CFR) of 14.0%
